

Service Project Presentation

You guys will be presenting your service projects to the rest of LINK Crew through a creative, fun, and expressive way as outlined below. Please self select into groups of 1-6. Resource: <http://www.dosomething.org/> If you are sponsored by Sir Trotter or Madam Moritz you will be presenting your project on Thursday, November 20. If you are sponsored by the Noble Hatak and Divine Ackerman, you will be presenting your project the next week, Thursday, December 4. You will be required to cover all of these areas and somehow explain each subject on your posterboard in a creative and fun way; you may use other technology as well. On the presentation dates, these posters or other technology will be displayed for the rest of LINK Crew to observe. Below are the requirements of what you and your service project will have to include on your wonderfully creative poster:

1. Summary
 - a. Summarize the purpose of your service project, how you planned, and what steps you had to take in order to insure success.
2. Who was involved?
 - a. Make sure to give credit to all of the students who participated by including everyone's names **and participation** in the poster (in other words, make sure everybody is involved in preparing for the presentation).
3. Who did you impact?
 - a. Give a thoughtful and circumferential explanation as to who in the community was influenced by your service project. Explain why you chose this group and how large your impact on them really was.
4. Highlight the positive points. Relates to leadership?
 - a. Create a positive poster that portrays your group's success to its fullest potential! We want to see how successful your project was and how much fun your group had doing it! Make your poster focus on these positive things; positive things from planning to your actual service project.
5. Add your own element!
 - a. Add anything else to your poster that will create a stronger presentation. Whether that be pictures or some other form of evidence, add anything that you think will add to the ultimate strength of your poster's presentation.
